

GBP Activity Comparison Tracker

Posting frequency, photo freshness, and Q&A activity — compared monthly, because a stale profile loses quietly.

Two Google Business Profiles can look similar at a glance while one is actively maintained and the other hasn't been touched in months. Google notices the difference even when a casual visitor doesn't — active profiles get more visibility.

Metric	You (this month)	[Competitor] (this month)
Posts published this month		
New photos added this month		
Most recent review response		
Unanswered Q&A questions		
Profile completeness (services, attributes filled in)		
Any new services/attributes added recently		

Run this alongside your Monthly Market Intelligence Scorecard — if a competitor's activity climbs sharply in one month, that's usually a signal worth understanding, not just logging.
